SIGNA Series High-Quality Filter Wheels

A New Industry Standard

The Signa series of motorized filter wheels will help you reduce cost without sacrificing quality—and pass your savings on to your customers—with a price point that is much less than other high-quality filter wheels on the market.

With a less than 100 millisecond filter transition time, Signa filter wheels will ensure that you maintain a competitive edge. Developed by industry-leading FLI engineers and tested for unwavering performance through hundreds of millions of iterations, Signa filter wheels are engineered to last.

Custom products are available.
